A. COURSE DESCRIPTION
   Credits: 3
   Lecture Hours/Week: *.*
   Lab Hours/Week: *.*
   OJT Hours/Week: *.*
   Prerequisites: None
   Corequisites: None
   MnTC Goals: None
   
   Historical investigation and presentation of the sources and growth of mathematical knowledge and principles, including Peano's axioms, the Axiom of Choice, and Russell's Paradox. Prerequisites: Junior or senior status and consent of the instructor. (Might not be offered every year.)

B. COURSE EFFECTIVE DATES: 08/22/1997 - Present

C. OUTLINE OF MAJOR CONTENT AREAS
   1. Mathematics in the ancient world
   2. Greek mathematics
   3. Mathematical development in the far east
   4. Mathematics in medieval Europe
   5. The development of algebra and calculus in the renaissance
   6. The development of analysis, abstract algebra, geometry and probability and statics in the eighteenth and nineteenth centuries
   7. Modern developments

D. LEARNING OUTCOMES (General)
   1. Understand the development of mathematical concepts and methods over time.
   2. Make connections between the culture of a civilizations and the mathematics they developed.
   3. Communicate mathematical ideas and understanding effectively.
   4. Have an appreciation for the many people who contributed to the subject of mathematics over time.

E. Minnesota Transfer Curriculum Goal Area(s) and Competencies
   None

F. LEARNER OUTCOMES ASSESSMENT
   As noted on course syllabus

G. SPECIAL INFORMATION
   None noted
