B. COURSE EFFECTIVE DATES: 08/26/1997 - Present
C. OUTLINE OF MAJOR CONTENT AREAS

1. Nutrients
   Nutritious Diet? How will you know?
   MyPyramid, Daily Food Guide
   DRIs, RDAs
   Nutrient density

2. Carbohydrate terminology
   Digestion, absorption, Transport, Energy Production
   Fiber
   DRI for carbohydrates

3. Diabetes.
   Glycemic foods
   Diabetes, Lactose intolerance

4. Introduction to lipids

5. Functions of fat
   Lipid structures
   Fat intake recommendations

6. Fats in foods
   Cholesterol, Saturated Fat And disease
   Hydrogenation and Trans fatty acids
   Reading labels
   Protein Structure
   Digestion and Protein Synthesis

7. Protein Quality, Protein Deficiency Disease
   Nitrogen balance

8. Introduction to vitamins
   Fat soluble vitamins

9. Water soluble vitamins
   Water

10. Diet analysis ¿ how to use diet analysis software

11. Introduction to minerals
    major minerals

12. weight management
    Eating disorders

13. Weight management and energy balance
    Causes of Obesity
    Amino Acids and muscle mass
    Fluid replacement beverages

14. Role of nutrition in disease
    Heart disease, hypertension, cancer
    Food safety
    Food Microbes, Food additives

15. Pregnancy
    Lactation and breastfeeding
    Infant feeding

16. childhood, teen and elderly nutrition
    Global issues and hunger
    Environment and food
    Overpopulation and food supply
D. LEARNING OUTCOMES (General)

1. demonstrate a basic knowledge of: digestion, metabolism, sources and functions of carbohydrates, fats and proteins.
2. be able to describe the sources, functions and deficiency diseases associated with several vitamins and minerals.
3. demonstrate a basic knowledge of: nutritional needs for active and sedentary populations including calories and nutrient needs.
