Bemidji State University

BIOL 2925: People of the Environment: Biological Perspectives

A. COURSE DESCRIPTION

Credits: 3
Lecture Hours/Week: *.*
Lab Hours/Week: *.*
OJT Hours/Week: *.*
Prerequisites: None
Corequisites: None

MnTC Goals: Goal 10 - People/Environment

Discussion and evaluation of current environmental biology topics, including biodiversity, ecosystems, biological resources, and human impact on the environment. This course fulfills Liberal Education requirements only and does not satisfy and Biology major or minor degree requirements. Liberal Education Goal Area 10.

B. COURSE EFFECTIVE DATES: 08/27/2018 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. Agriculture
2. Biodiversity/invasive species
3. Climate Change/Ozone Depletion
4. Ecological concepts - Biodiversity
5. Energy and renewable resources.
6. Environmental economics
7. Fossil Fuels: History and Future
8. Groundwater
9. Hazardous wastes
10. Human Population Growth
11. Introduction/Easter Island
12. Risk toxicology/Fate of toxins in the environment
13. Tragedy of the Commons
14. Water and conflict

D. LEARNING OUTCOMES (General)

1. gain an understanding of biogeochemical processes in the environment and of the social, cultural, and economic influences shaping human impacts on the environment.
2. employ critical thinking skills in reflecting on values-based and ethical dimensions of environmental decision-making
3. integrate various disciplinary perspectives on environmental problems and potential solutions
E. Minnesota Transfer Curriculum Goal Area(s) and Competencies

Goal 10 - People/Environment

1. Explain the basic structure and function of various natural ecosystems and of human adaptive strategies within those systems.
2. Discern patterns and interrelationships of bio-physical and socio-cultural systems.
3. Describe the basic institutional arrangements (social, legal, political, economic, religious) that are evolving to deal with environmental and natural resource challenges.
4. Evaluate critically environmental and natural resource issues in light of understandings about interrelationships, ecosystems, and institutions.
5. Propose and assess alternative solutions to environmental problems.
6. Articulate and defend the actions they would take on various environmental issues.

F. LEARNER OUTCOMES ASSESSMENT

As noted on course syllabus

G. SPECIAL INFORMATION

None noted
