A. COURSE DESCRIPTION

Credits: 3
Lecture Hours/Week: 0
Lab Hours/Week: 0
OJT Hours/Week: *.*
Prerequisites: None
Corequisites: None

An examination of past interactions between human society and the natural world in what is now the United States. Issues to be discussed in the course include Native American resource management; the ecological effects of the arrival of Europeans, Africans, and Asians in North America; resource exploitation in the industrial era; the preservationist and conservationist movements; and the historical roots of current environmental problems. [**Core Curriculum Goal Area 10**]

B. COURSE EFFECTIVE DATES: 08/27/2018 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. Biodiversity
2. Climate change
3. Ecology
4. Energy
5. Evolution and Extinction
6. Food and Soil
7. Population
8. Risk and Toxicology
9. The Nature of Science; Economics, Politics and Worldviews
10. Waste
11. Water

D. LEARNING OUTCOMES (General)

1. improve their ability to critically assess environmental issues and discussions about those issues by examining arguments and source materials
2. gain a greater understanding of the relation between human societies and their environments, particularly institutional arrangements that shape and/or reflect the cultural values underlying humans' interaction with their environs
3. learn to effectively develop, support, and communicate their own ideas, interpretations, positions, and arguments.
E. Minnesota Transfer Curriculum Goal Area(s) and Competencies
   Goal 10 - People/Environment
   1. Explain the basic structure and function of various natural ecosystems and of human adaptive
      strategies within those systems.
   2. Discern patterns and interrelationships of bio-physical and socio-cultural systems.
   3. Describe the basic institutional arrangements (social, legal, political, economic, religious) that are
      evolving to deal with environmental and natural resource challenges.
   4. Evaluate critically environmental and natural resource issues in light of understandings about
      interrelationships, ecosystems, and institutions.
   5. Propose and assess alternative solutions to environmental problems.

F. LEARNER OUTCOMES ASSESSMENT
   As noted on course syllabus

G. SPECIAL INFORMATION
   None noted
