   In Indigenous communities, there is a deep and lasting connection to place. Today, there exists
   overwhelming evidence that connection to place offers important elements for overall individual wellness.
   However, many communities face challenges in their environments that are detrimental to their health and
   well-being. To support these communities, there is a need to reconnect them with ways to restore the
   sustainability of their environment and connection to place. In this course, students will learn the critical
   connections between the environment and health and will explore the influences of connection to place
   within the context of Indigenous worldviews and ways of knowing. This is an experiential learning course
   -- learning through interaction, projects, and reflection.
