ENVR 6250: Advanced Environmental Studies

A. COURSE DESCRIPTION

   Credits: 3
   Lecture Hours/Week: 0
   Lab Hours/Week: 0
   OJT Hours/Week: *.*
   Prerequisites: None
   Corequisites: None
   MnTC Goals: None

   The social causes, ecological impacts, and human health effects of environmental degradation. Students provide in-depth analyses of environmental problems through laboratory research and field studies, library research, oral presentation, and written communication.

B. COURSE EFFECTIVE DATES: 08/15/2020 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

   1. Interdisciplinary critical examination of the root causes of environmental problems and an assessment of historical and contemporary approaches to solving a range of environmental problems, increasingly through sustainability-based perspectives.

D. LEARNING OUTCOMES (General)

   1. develop an understanding of the complex interrelationship between social, economic, and environmental problems in the 21st Century.
   2. investigate and be able to assess solutions to environmental problems, considering historical perspective and social and economic constraints.
   3. conduct a comprehensive literature review to gain further insight into the development of the environmental field and its contemporary trends.

E. Minnesota Transfer Curriculum Goal Area(s) and Competencies

   None

F. LEARNER OUTCOMES ASSESSMENT

   As noted on course syllabus

G. SPECIAL INFORMATION

   None noted
