A. COURSE DESCRIPTION

Credits: 4
Lecture Hours/Week: 0
Lab Hours/Week: 0
OJT Hours/Week: *
Prerequisites: None
Corequisites: None
MnTC Goals: None

Focuses on common physiological health and illness concerns experienced by adults and older adults. Emphasis will be on implementing evidence-based nursing care that reflects an understanding of human growth and development, pathophysiology, pharmacology, medical management, and nursing management for adults and older adults. Prerequisite(s): Pre-licensure track enrollee, NRSG 3011, NRSG 3000, NRSG 3120; Co-requisite(s): NRSG 3007.

B. COURSE EFFECTIVE DATES: 08/16/2021 - Present

C. OUTLINE OF MAJOR CONTENT AREAS
1. Upper and lower gastrointestinal
2. Cardiovascular
3. Integumentary
4. Wounds
5. Sexuality
6. Reproduction
7. Sensory
8. Neurologic systems

D. LEARNING OUTCOMES (General)
1. interpret physiological alterations in relationship to actual/potential clinical management approaches.
2. analyze the actual/potential multi-system impact of selected physiological alterations.
3. interpret nursing practice(s) which support a holistic approach for individuals/families experiencing altered health states.
4. interpret nutritional and pharmacological therapies supportive to altered health states.
5. analyze nursing practice considerations distinctive to the adult and older adult.
6. examine health and nursing care resources/settings which address the spectrum of health promotion, attainment, and preservation.
