North Hennepin Community College

BIOL 1000: Life Science

A. COURSE DESCRIPTION

Credits: 4
Lecture Hours/Week: 3
Lab Hours/Week: 1.5
OJT Hours/Week: *.*

Prerequisites:
This course requires any of these 11 prerequisites
  - A score of 1 on test Exempt from taking Reading placement tes
  - A score of 78 on test Accuplacer Reading Comprehension
  - A score of 250 on test Accuplacer NG Reading
  - A score of 250 on test Accuplacer NG COMP Reading
  - A score of 108 on test Accuplacer ESL Reading Skills
  - A score of 1 on test Dev Ed Course Waiver-Rdg
  - A score of 21 on test ACT Reading
  - A score of 1047 on test MN Comprehensive Assessment Reading
  - ADEV 0952 - College Reading and Learning Strategies II (Minimum grade: 1.67 GPA Equivalent)
  - EAP 0930 - Academic Reading and Study Skills (Minimum grade: 1.67 GPA Equivalent)
  - EAP 1230 - College Reading and Studying Skills

Corequisites: None

MnTC Goals: Goal 03 - Natural Science

The course introduces the breadth of biology from the principles of chemistry to ecology. The production and utilization of biological energy is explored at the cellular and organism level. The principles of inheritance and cellular reproduction are explored at the molecular, cellular level and organism level. The unity and diversity of life and life processes is emphasized. The laboratory focuses on the techniques required to discover biological principles. Activities are hands-on.
Prerequisite: ENGL 0990 or a 78 on the Accuplacer Reading Comprehension (3 hours lecture, 3 hours lab).

B. COURSE EFFECTIVE DATES: 08/25/1997 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. This course examines the general principles of chemistry, the organization of cells, and the properties and functions of biological macromolecules. The production and utilization of biological energy are explored at the cellular level and the similarity found in all organisms is emphasized. Principles of inheritance and cellular reproduction are explored at the molecular and cellular level. This course also examines general principles of ecology and evolution. The laboratory is an integral part of the course; activities are hands-on.
D. LEARNING OUTCOMES (General)
1. View biology as a collection of organizing themes, rather than a collection of facts. (MnTC G2 comp a, c; G 3 comp a; ELOs 1, 2)
2. Understand the unity and diversity of life on earth. (MnTC G 2 comp a, b; G 3 comp a; ELO 1)
3. Develop an understanding of biological processes at the molecular level and cellular level. (MnTC G 2 comp a, c; G 3 comp a, c?; ELO 1, 2)
4. Learn some of the techniques used in the modern biology laboratory. (MnTC G 2, comp a, b, c; G3 comp a, b, c; ELOs 1, 2, 3)
5. Identify potential areas of career interest (ELO 3)
6. Make more informed decisions on personal and civic choices (MnTC G 3 comp d; ELO 3, 4.)

E. Minnesota Transfer Curriculum Goal Area(s) and Competencies
Goal 03 - Natural Science
1. Demonstrate understanding of scientific theories.
2. Formulate and test hypotheses by performing laboratory, simulation, or field experiments in at least two of the natural science disciplines. One of these experimental components should develop, in greater depth, students' laboratory experience in the collection of data, its statistical and graphical analysis, and an appreciation of its sources of error and uncertainty.
3. Communicate their experimental findings, analyses, and interpretations both orally and in writing.

F. LEARNER OUTCOMES ASSESSMENT
As noted on course syllabus

G. SPECIAL INFORMATION
1. Knowledge of Human Cultures and the Physical and Natural World --Through study in the sciences, mathematics, social sciences, humanities, histories, languages, the arts, technology and professions.
2. Intellectual and Practical Skills - Including: Inquiry and analysis; Critical and creative thinking; Written and oral communication; Quantitative literacy; Information literacy; Teamwork and problem solving.
3. Personal and Social Responsibility and Engagement - Including: Civic knowledge and involvement - campus, local and global; Intercultural knowledge and competence; Ethical reasoning and action; Foundations and skills for lifelong learning.
4. Integrative and Applied Learning - Including: Synthesis and advanced accomplishment across general education, liberal studies, specialized studies and activities in the broader campus community
