

Inver Hills Community College

EMS 2530: Pediatric and OB/GYN

A. COURSE DESCRIPTION

Credits: 1

Lecture Hours/Week: 1

Lab Hours/Week: 0

OJT Hours/Week: *.*

Prerequisites:

EMS 2460 - Medical Emergencies I

Corequisites: None

MnTC Goals: None

Provides comprehensive instruction on obstetrical emergencies, childbirth, pediatric assessment, evaluation and stabilization. This course consists of discussion and hands-on practice of simulated childbirth, neonatal resuscitation, pediatric advanced life support and medical emergency evaluation of the pediatric patient. Pediatric medical emergencies and trauma are also discussed. This course incorporates material outlined in the American Heart Association Pediatric Advanced Life Support (PALS) course, and certification is available to those successfully completing the requirements.

Prerequisite: Acceptance into the Paramedic program.

B. COURSE EFFECTIVE DATES: 08/26/2013 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. Gynecologic Emergencies 10%
2. Emergency Childbirth 10%
3. Complications of Childbirth 10%
4. Delivery and Resuscitation of the Neonate 10%
5. Pediatric Assessment 12%
6. Medical Emergencies and the Child 10%
7. Childhood Diseases, Care and Treatment 10%
8. Pediatric Trauma Care 10%
9. Advanced Resuscitation for the Pediatric Patient 10%
10. Sudden Infant Death Syndrome and Related Topics 8%

D. LEARNING OUTCOMES (General)

1. Review the anatomic structures and physiology of the female reproductive system
2. Differentiate between normal and abnormal delivery
3. State indications of imminent delivery
4. State the steps to assist in the delivery of a newborn
5. Describe the care of the Neonate
6. Describe the care of the placenta
7. Describe the abnormal deliveries and discuss procedures for handling each one
8. Describe the maternal complications of labor
9. Identify the normal events of pregnancy
10. Identify the stages of labor and the paramedic's role in each
11. Define child abuse and neglect
12. Define implied consent as it applies to the treatment of a minor
13. Demonstrate advanced cardiac care procedures such as; intraosseous infusion, volume replacement, cardiac resuscitation, trauma care and immobilization, endotracheal procedures
