This course will provide the student an integrative, family-centered approach to the care of mothers, newborns, and children. Emphasis is placed on normal and abnormal conditions of pregnancy, normal growth and development, family structure and function, family dynamics, health and illness states of children, and the promotion of safe, healthy behaviors in the growing family. Clinical experiences provide the student an opportunity to apply theoretical concepts and implement collaborative, safe patient care to mothers, newborns, and children in select settings. Emphasis is also placed on the management of growing families facing emotional and psychological stressors, as well as the promotion and maintenance of the mental health of individuals and families. Prerequisites: NURS1400, NURS1410, NURS1420, NURS1460, and NURS1430 if LPN (3 credits: 2 lecture/1 lab)
