   This course focuses on the process to analyze and draw a small one-story residence design to meet industry standards and building codes. From a given design concept, students will draw a floor plan, learning how to determine the correct dimensions for placing walls and selecting code compliant door and window sizes. Exterior elevations of the house will be drawn based on wall section details that will also be drawn. The drawing will be created on computer aided design (CAD) software. (Prerequisite or concurrent enrollment with ARCH 1043)(0 credits lecture/1 credit lab)
