A. COURSE DESCRIPTION

Credits: 3
Lecture Hours/Week: 3
Lab Hours/Week: *.*
OJT Hours/Week: *.*

Prerequisites:
This course requires either of these prerequisite categories
1. MACH 1505 - Blueprint Reading/Geometric Tolerancing I (Number of Years Valid: 5)
   Or
2. MEDR 1602 - Engineering Drawing II (Number of Years Valid: 5)

Corequisites: None
MnTC Goals: None

This is an intermediate course in industrial blueprint reading utilizing geometric tolerancing. Contents include orthographic projects, sectional views, spacial views, screw threads, and steel identification. This course teaches learners the technical knowledge to interpret industrial blueprints. Prerequisite: MACH1505 or MEDR1602.

B. COURSE EFFECTIVE DATES: 12/12/1997 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. Identify datum planes, axis, and points.
2. Identify geometric characteristic symbols and types.
3. Define 2D & 3D controls.
4. Calculate MMC and LMC.
5. Calculate allowed position.
6. Utilize paper gages for verification.
7. Utilize and identify MMC, LMC, and RFS modifiers.
8. Interpret features of size and features without size.
9. Calculate inner and outer boundaries.

D. LEARNING OUTCOMES (General)

1. The learner will have the ability to interpret blueprints.
2. The learner will interpret blue prints using geometric tolerancing symbols.

E. Minnesota Transfer Curriculum Goal Area(s) and Competencies

None

F. LEARNER OUTCOMES ASSESSMENT

As noted on course syllabus

G. SPECIAL INFORMATION

None noted
