A. COURSE DESCRIPTION

Credits: 4
Lecture Hours/Week: 4
Lab Hours/Week: 0
OJT Hours/Week: 0

Prerequisites:
This course requires any of these 12 prerequisites
   A score of 250 on test Accuplacer NG Advanced Algebra Functions
   A score of 22 on test ACT Math
   A score of 1158 on test MN Comprehensive Assessment Math
   A score of 2 on test Algebra
   A score of 50 on test Accuplacer College Level Math
   A score of 530 on test SAT Math Composite
   MATH 0431 - Intermediate Algebra (Minimum grade: 2.0 GPA Equivalent and Number of Years Valid: 5)
   MATH 1415 - Mathematical Reasoning
   MATH 1420 - College Algebra
   MATH 1425 - Precalculus (Minimum grade: 2.0 GPA Equivalent)
   MATH 1426 - Calculus I
   MATH 1460 - Quantitative Problem Solving

Corequisites: None

MnTC Goals: Goal 04 - Mathematical/Logical Reasoning

This course is primarily for business, science, liberal arts, psychology, and education majors. Topics studied include descriptive measures for empirical data, theory of probability, probability distributions, sampling distributions of statistics from large and small samples, estimation theory, hypothesis testing, correlation, and regression.

B. COURSE EFFECTIVE DATES: 03/04/2021 - Present

C. OUTLINE OF MAJOR CONTENT AREAS

1. Understanding and applying statistical terminology.
2. Summarizing statistical data graphically.
3. Determine and interpret the measures of center, variation, and box plots.
4. Apply basic concepts of probability: addition and multiplication rules.
5. Understand and apply probability through simulations.
6. Understand and apply binomial probability distribution.
7. Understand and apply normal probability distributions with application.
8. Sample distributions and estimators.
9. Understand estimates and sample sizes for a given population.
10. Understand and apply hypothesis testing: create, analyze, and summarize.
11. Utilize linear regression and correlation concepts.
12. Understand and apply a two sample test for a population mean.
D. LEARNING OUTCOMES (General)

1. The learner will demonstrate an understanding of the basic concepts of descriptive statistics, probability, and the methods of statistical inference.
2. The learner will demonstrate the applications of statistical concepts to a variety of applied problems.
3. The learner will demonstrate the ability to use statistical software in applied statistical analysis problems.

E. Minnesota Transfer Curriculum Goal Area(s) and Competencies

Goal 04 - Mathematical/Logical Reasoning

1. Illustrate historical and contemporary applications of mathematical/logical systems.
2. Explain what constitutes a valid mathematical/logical argument (proof).
3. Apply higher-order problem-solving and/or modeling strategies.

F. LEARNER OUTCOMES ASSESSMENT

As noted on course syllabus

G. SPECIAL INFORMATION

None noted
