The student will build on previous skills learned in diagnosing and repairing basic problems associated with woodwind instruments. Techniques of disassembly, tenon fitting, head corksing, key fitting, padding, key corksing, regulation as well as play testing the instrument will be covered. In addition, nomenclature, care of metal and finishes, body straightening, key alignment, spring replacement, and soft soldering will be taught. As a project for the course, the student will perform a complete repad on a flute including record keeping and invoicing requirements. It is recommended that the student have playing skills on the instrument prior to enrolling, as a playing proficiency is required for completion of the course. Grading is based on project evaluation and written tests. (Prerequisite: BIRT1100 or field experience commensurate with course content as determined by instructor) (4 Credits: 2 lecture/2 lab)
